- Master's programs based on research and thesis
- Doctoral programs
- Professional Veterinary Medicine Program, conferring the Doctor of Veterinary Medicine
  (Our school of Veterinary Medicine is ranked No. 3 in the nation (U.S. News & World Report))

Research

One of Colorado State University’s most productive research units, driving discovery and innovation

- **$51 million** in total research expenditures in FY 2013

Helping to define our research enterprise are:

- **Collaboration** with fellow researchers worldwide – including those at medical institutions
  – and with corporate, foundation, and agency partners;
- **Translational medicine** – providing critical insights for human well-being and medical care; and
- **One Health sciences** – focused on improving public health with scientific investigation at the interface of human, animal, and environmental health.

Clinical service units serving science, industry, and the public

- **Equine Reproduction Laboratory**, about 3,000 visits annually
- **Veterinary Diagnostic Laboratories**, with 102,000 requests in most recent fiscal year
- **Veterinary Teaching Hospital**, about 40,000 patient visits annually

Attracting robust private giving to support students and excellence in teaching, research, and clinical service
