Your dog has been treated with radioactive iodine or other radioisotope and still has a low level of radioactivity at the time of release. The radioactivity in your dog is below the level necessary for complete isolation from humans. Some radioactivity will be present for the next few weeks. Therefore it is required that you agree to the following restrictions for the next two (2) weeks:

**DOG:**

1. Children under age of 18 and pregnant women must be informed that contact with the dog is prohibited; they should keep a distance of 3 feet.
2. Avoid kissing the dog and minimize any close contact with the dog.
3. Your dog can go on short walks, but be sure to have your dog urinate/defecate in YOUR yard first.
4. Feces should be flushed in your toilet
5. Always wash hands after handling feces and touching the dog.
6. If any questions arise, please contact Nuclear Medicine Service at (970) 297-4447 or (970) 297-5000.
