DVM Tutor Job Description

Tutoring is a supplement to classroom teaching. Tutors are not expected to know everything about the subject for which they tutor, and are encouraged to work with faculty to optimally serve tutees.

Tutors work with their tutees to determine a schedule that serves both individuals. In addition, each tutor selects the courses for which services are provided, and the number of tutees. We request that tutors only select courses in which they have excelled.

You will:

- Provide individual and small group tutoring to students.
- Assist DVM students in improving academic achievement by meeting with them on a regular and/or as needed basis to improve study skills, review challenging class material, and/or discuss student learning objectives.

Tutors must review and agree to the terms outlined in the DVM Tutor Services Policy.

Tutors generally work up to 3 hours/week/tutee. Around the time of exams this may increase to up to 5 hours/week/tutee, subject to the tutor's availability.

We ask that both tutors and tutees attend sessions as arranged and come prepared to achieve the aims of the session.
