Clinical or Tenure Track  
Equine Radiology Faculty Position

Colorado State University, Department of Environmental and Radiological Health Sciences, invites applications to fill a vacancy for a faculty position (clinical track or tenure track) at an Assistant, Associate or Full Professor level in equine diagnostic imaging. Candidates must have a DVM or equivalent degree. Candidates should be ACVR (or equivalent) board certified or board eligible. The successful candidate will be a second equine imaging radiologist joining an internationally recognized, diagnostic imaging program, comprised of an existing equine faculty radiologist and 4 small animal faculty radiologists, three-four residents, ten technologists, three office staff and a PACS administrator. The program is located in the James L. Voss Veterinary Teaching Hospital (VTH) in Fort Collins, Colorado, with an annual imaging caseload of nearly 16,000. In addition to full small animal imaging equipment, the equine imaging resources include digital and computed radiology, ultrasound, nuclear medicine, 16-slice CT scanner and a 1.0 Tesla Oni MRI scanner. The Colorado State University Flint Animal Cancer Center and the Equine Orthopedic Research Center are both located at the VTH. Clinical duties include equine radiology, ultrasound, nuclear medicine, CT and MRI. Teaching responsibilities will include lectures, labs, and clinical teaching of diagnostic imaging to professional students, interns, residents and graduate students. Clinical track candidates will be assigned duties with approximately 75% clinical service and 25% in teaching/research/committee service activities. Tenure track candidates will have approximately 50% clinical service and 50% teaching/research/committee service activities. For tenure applicants, clinical investigation projects and scholarly endeavors to advance veterinary diagnostic imaging are expected and there are abundant opportunities in this program. A clinical track candidate can participate in clinical investigative projects as desired, but this would not be required. Every faculty member participates in professional outreach, committee service, and curriculum development. Salary will be commensurate with the candidate's qualifications and experience. Reflecting departmental and institutional values, candidates are expected to have the ability to advance the Department's commitment to diversity and inclusion.

Candidates should submit electronically a curriculum vitae; a statement of professional goals, including teaching interests, and for the tenure track candidates, research interests; and the names of three references, with address, phone number, and email address.

Applications will be accepted until the position is filled. The search committee will begin reviewing completed applications on February 1, 2015. All applications should be submitted to:
