Assistant Professor Faculty Position in Epidemiology

The Department of Environmental and Radiological Health Sciences at Colorado State University in Fort Collins, Colorado invites applications for a tenure-track faculty position in epidemiology at the Assistant Professor level. This position is located within a unique multi-disciplinary environment with a history of excellence in epidemiologic research and teaching programs. The faculty member will have the opportunity to be a member of the Colorado School of Public Health (www.publichealth.ucdenver.edu), including the Graduate Degree Program in Public Health at Colorado State University (https://publichealth.colostate.edu).

Applicants must have a doctoral degree in Epidemiology or a closely-related field. Previous teaching experience is preferred. Successful candidates will have a history of and/or potential to develop an externally funded research program. Candidates whose research focus includes environmental epidemiology (especially focused in water), occupational epidemiology, molecular / genetic epidemiology, infectious disease epidemiology, community-based epidemiology, and applicants with strong methods/quantitative skills are particularly encouraged to apply; other areas will also be considered. The faculty member will be expected to contribute to teaching in the undergraduate and/or graduate programs, mentor students, and develop a vibrant, externally funded research program. Reflecting departmental and institutional values, candidates are expected to have the ability to advance the Department’s commitment to diversity and inclusion.

To apply, candidates should submit the following materials: letter of interest (addressing required and preferred attributes; describing interest and focus areas for research and teaching), full curriculum vitae, and contact information for three references (including telephone number, and email address). References will not be contacted without prior notification to applicants. Applications will be received until the position is filled; however, for full consideration, please apply by November 26, 2018. Questions about the position can be directed to Dr. Jennifer Peel, Search Committee Chair (Jennifer.Peel@colostate.edu; 970-491-6391). Questions about the application process can be directed to Ms. Jean Runyan, (Jean.Runyan@colostate.edu; 970-491-5222). Application materials should be submitted the following link: http://jobs.colostate.edu/postings/61077.
Colorado State University, with an enrollment of over 28,000 students, is located in Fort Collins at the base of the Rocky Mountains. Less than an hour from Rocky Mountain National Park, Fort Collins is a small city of 160,000 with an excellent school system, an expansive park and natural area program with extensive biking, hiking and walking trails, and over 300 days of sunshine each year. Money Magazine consistently ranks Fort Collins as one of the “Best Places to Live” in the United States. Fort Collins has exceptional and abundant outdoor and cultural activities, and the cities of Boulder and Denver are within an hour drive. More information about Fort Collins and Colorado State University can be obtained at https://www.visitftcollins.com/ and https://ramtrax.colostate.edu/.

The Department of Environmental and Radiological Health Sciences is home to 70 undergraduate Environmental Health students, over 100 graduate students, and 40 faculty members. Graduate students pursue degrees (MS, PhD) in Environmental Health, specializing in Epidemiology, among other specializations. The Department has a strong tradition in environmental epidemiology, cancer epidemiology, reproductive epidemiology, indoor and ambient air pollution, respiratory and cardiovascular health, occupational health and safety, ergonomics, toxicology, radiation protection, and radiation cancer biology. Research and collaboration opportunities exist throughout the Department, the University, and in nearby institutions, including the NIOSH Mountain and Plains Education and Research Center, the High Plains Intermountain Center for Agricultural Health and Safety, the Center for Vector-borne Infectious Diseases, the Infectious Disease Research Center, the Energy Institute, the Water Center, the Human Performance Clinical/Research Laboratory, the Proteomics and Metabolomics Core Facility, the Centers for Disease Control and Prevention (Fort Collins branch), the Center for Healthy Aging, National Jewish Medical and Research Center, and the University of Colorado Health system.

Colorado State University, along with partner institutions, the University of Colorado Anschutz Medical Campus and the University of Northern Colorado, is part of the collaborative Colorado School of Public Health. The Graduate Degree Program in Public Health at Colorado State University, offering a Master of Public Health degree, encompasses multiple Departments and Colleges on the campus.

CSU is an EO/EA/AA employer and conducts background checks on all final candidates.
