Assistant or Associate Professor – Immunologist/Immunopathologist

The Department of Microbiology, Immunology and Pathology (MIP), College of Veterinary Medicine and Biomedical Sciences, Colorado State University, is seeking to fill a tenure-track faculty appointment (Assistant or Associate Professor) in immunology/immunopathology who will integrate well into areas of strength in the Department, including human and animal infectious disease and cancer. The successful candidate will have an established record in research and scholarly activity in the area as well as experience in teaching and mentoring students.

The successful candidate will have multiple opportunities to interact with over 70 faculty in a dynamic, highly productive (e.g. extramural funding typically exceeds $25 million per year) and synergistic environment. Key areas of research in the Department include mycobacterial diseases, arthropod-borne viral pathogens, prion/protein-misfolding diseases, and the diagnostic investigation of naturally occurring animal diseases. Candidates with interest in the immunology of mycobacterial diseases are particularly encouraged to apply.

The successful candidate will also participate in teaching in the Department’s undergraduate and/or graduate programs. MIP is a leader in education in the microbiology and pathology disciplines. Department faculty currently advise 43 PhD students, 6 DVM/PhD students, 28 veterinary residents, 5 thesis-based MS students, 35 non-thesis MS students, and 226 undergraduate microbiology majors. The candidate will be expected to develop new courses and/or enhance existing immunology courses – including hands-on instrument training modules. Reflecting departmental and institutional values, candidates are expected to have the ability to advance the Department’s commitment to diversity and inclusion.

Research and teaching opportunities in MIP are enriched by the highly interactive and collaborative environment with a variety of world-recognized research programs on campus and nearby. In addition to the Department’s Mycobacteria Research Laboratories (MRL), Arthropod-borne and Infectious Diseases Laboratories (AIDL), Prion Research Center (PRC) and Veterinary Diagnostic Laboratory (VDL), the Center for Disease Control – Division of Vector Borne Infectious Diseases as well as the USDA National Wildlife Research Center and Centers for Epidemiology and Animal Health are situated within walking distance of MIP facilities.

Candidates must have a PhD, MD or DVM degree (or equivalent), an established record of scholarly activity in immunology, and evidence of teaching/mentoring students. Salary and start up packages are negotiable. More information about the position is available at http://csu-cvmbs.colostate.edu/college-office.Pages/cvmbs-employment-opportunities.aspx.

Applications should include 1) a cover letter addressing the applicant’s qualifications, 2) resume or curriculum vitae, 3) statement of research goals 4) statement of teaching goals, and 5) name and contact information for three professional references. Letters of reference will be solicited from referees at the semi-finalist interview stage. Application materials of semifinal candidates, including letters of reference, will be made available for review by the entire faculty of the Microbiology, Immunology and Pathology Department. References will not be contacted without prior notification of the candidate.

Applications and nominations will be accepted until the position is filled; however to ensure full consideration applications should be submitted by December 15, 2017.
