Veterinary Diagnostic Lab Director
Western Slope Veterinary Diagnostic Lab Director: This position is located in Grand Junction, CO. The successful candidate will direct five full-time technical staff, promote staff career growth and a common sense of mission, manage all laboratory activities including facilities, provide oversight for all laboratory testing activities, participate in the laboratory system Quality Assurance program and serve as the professional contact for consultation, diagnosis and investigation of animal disease problems submitted by veterinarians, animal producers and animal owners. The appointed person will also participate in the Fort Collins-based Field Investigation Unit, provide outreach to the livestock industry and other animal interest groups, provide diagnostic testing for regulatory agencies, seek to expand testing capabilities and, when possible, update existing laboratory services.

This is an open rank search; special appointment (non-tenure) position in the Department of Microbiology, Immunology and Pathology. Faculty rank at the time of appointment will be commensurate with career accomplishments.

Apply online to: http://jobs.colostate.edu/postings/32953.

Applicants should submit a cover letter, curriculum vitae and list of 3 professional references with contact information. References will not be contacted without the prior notification of the candidate. Applicants should address the minimum/preferred qualifications in the cover letter, specifically the motivation to engage in outreach opportunities if selected for this position.

For more information about the position contact Gary Mason, Search Chair at 970-297-5128 or by email: Gary.L.Mason@colostate.edu

CSU is an EO/EA/AA employer and conducts background checks on all final candidates.
