Course: Tropical Field Biology and Primatology

**Early Summer:** May 20 - June 10

**Late Summer:** July 20 - Aug. 10

**Deadline:** April 15, 2014

This course teaches the basics of navigation, radio telemetry, ornithology, entomology, herpetology, and animal behavior, with a special emphasis on the eleven primate species at the site.

Wildlife Handling Research Assistantship

**Dates:** June 1 - July 31

**Commitment:** 6 weeks

**Deadline:** March 15, 2014

Gain hands-on experience working with multiple groups of two species of wild tamarins in an annual capture-and-release program. This assistantship is for those interested in wildlife biology, primatology and veterinary science.

All programs conducted at the Los Amigos Biological Field Station, Southeastern Peru

Participants must be 18 years and above
